Module 1

Lesson 1: Develop a Macro Industry Perspective

Context:

As an aspiring entrepreneur, understanding the broader industrial landscape is crucial. This lesson, "Develop A Macro Industry Perspective," equips you with the knowledge and skills to take a broader view and analyze industries at a macro level. Grasping this broader perspective is essential not only for identifying emerging opportunities but also for aligning these with your entrepreneurial passion and capabilities.

Program overview, and your **Venture Journey** over 14 weeks

1. Problem Identification	2. Customer Identification & Needs Validation	3. Solution Idea Generation
Week 1-2	Weeks 2-4	Week 4
■ Orientation ■ Develop Macro Industry-Problem view ■ Assemble “Real-World” Problems ■ Examine Chosen Problems ■ Analyze Problems	■ Identify customer segments ■ Assess 'jobs-to-be-done' ■ Develop Customer Personas ■ Understand Customer Validation ■ Validate Customer-Problem fit ■ Pivot/Refine Customer-Problem Fit for Feasibility	■ Understand Ideation techniques ■ Generate Solution Idea
4. Opportunity & Competition Mapping	5. Prototype Development & MVP	6. Opportunity Feasibility Assessment & Sizing
Week 5	Week 6	Week 7-8
■ Identify Global competitors ■ Review Industry Trends and Estimate Market Size (TAM) ■ Introduction to Financial Planning	■ Overview of Prototypes & MVP ■ Build an Initial Prototype ■ Prototype for Early Validation	■ Map your Relative Position in the Market ■ Estimate Opportunity Size
7. Business Modelling	8. Marketing & Sales Strategy	9. Financial Management for Profitability
Week 8-9	Week 9-10	Week 11-12
■ Examine Revenue Model ■ Revenue Models continued ■ Review and Organize the Lean Canvas ■ Build the LC for your Startup	■ Understand Marketing & Sales ■ Recommend a Go-To-Market (GTM) Approach ■ Map a Sales Process	■ Deep Dive into Financial Planning ■ Analyze the Path to Profitability ■ Understand Bootstrapping and Funding Options
10. Team & Talent Requirement	11. Orientation for Scale	12. Venture Idea Feasibility Presentation
Week 12	Week 13	Week 14
■ Finding Co-founders and Mentors ■ Building an Initial Team	■ Thinking Beyond the Prototype - Scale Opportunity & Orientation ■ Persuasive Story-Telling for a Viable Venture Idea ■ Pitch preparation	■ Practice Pitch ■ Final Pitches

Concepts covered in this lesson:

Macro Industry Perspectives

- Definition and relevance of having a macro view in the business world.
- How a broad perspective facilitates spotting and leveraging large-scale opportunities.

Industry Analysis:

- Exploration of major industries such as technology, healthcare, and automotive.
- Examination of specific segments within these industries, such as AI, telemedicine, and electric vehicles.

Market Trends and Innovations

- Techniques for identifying and analyzing prevailing market trends
- Discussion on how technological advancements and innovations reshape industries.

Strategic Entrepreneurial Thinking:

- How to identify and assess entrepreneurial opportunities using a macro perspective.
- Methods to align personal passions with market opportunities for sustainable business ventures.

After completing this lesson, you will be able to:

1. Explain the Concept of a Macro Industry Perspective:

Understand the strategic advantage of a broad industry outlook and its necessity in entrepreneurship.

2. Identify and Analyze Industries and domains:

Gain insights into various industries, recognize their domains, and understand how these areas interconnect and contribute to the economy

3. Assess Innovations and Market Trends:

Evaluate how innovations and evolving market trends impact industry dynamics and offer opportunities for entrepreneurial ventures.

4. Align Passions with Industry Opportunities:

Discover areas within industries that excite you and learn how to leverage your skills and interests to carve out a niche.

Steps for you to take:

1. Explore Tool: Industry Case Study- Part 1

2. Find your area of interest

3. Create your Passion CV

4. Pitch to find your team members & create your team

Develop a Macro Industry View

"In entrepreneurship, success often hinges on the ability to see the forest for the trees."

Welcome to your first step in exploring the exciting world of entrepreneurship! In this lesson, "Develop A Macro Industry View," you will learn foundational concepts that are crucial for any entrepreneur. Understanding these concepts will help you navigate the complexities of different industries and recognize opportunities for innovation and growth.

What is an Industry?

An industry is a group of companies that are related based on their primary business activities. Think of an industry as a big category where businesses compete or work. For example, the fashion industry includes all companies involved in designing, manufacturing, and selling clothing.

What is a Domain?

Within each industry, there are smaller segments called domains. These domains represent specialized areas that companies focus on. For instance, in the fashion industry, domains could include luxury fashion, sportswear, or accessories. Each domain targets specific customer needs and preferences.

Why a Macro Industry View is Important?

Having a Macro Industry View means looking at industries and their domains from a broad perspective. It's about understanding the bigger picture of how industries operate, grow, and interact with

economic and social trends. This view is crucial because it helps you:

- **Identify Opportunities:** By understanding the scope of an industry and its domains, you can spot opportunities that others might miss.
- **Anticipate Challenges:** Knowing the trends and dynamics at play in the broader industry helps you foresee challenges and prepare solutions.
- **Drive Innovation:** With a macro view, you can see how different domains within industries can interact or merge to create new ideas and products.

Developing a Macro industry problem Perspective is crucial for new or aspiring entrepreneurs and entrepreneurial leaders for two key reasons:

Discover Your Passion

WHAT

- Discovering your passion means identifying a deep interest or a cause that motivates and drives you.
- It's about finding an area that you feel a personal connect with.

Develop Macro Context of the Industry

WHAT

- Identify not just immediate customer problems, but also larger industry trends, potential market shifts, and related emerging consumer behavior, technology, urbanization, and other trends around it.

Where you can apply your enthusiasm, skills, and network to create value.

WHY

- This passion often becomes the driving force behind the perseverance needed to overcome challenges and the commitment to see a venture through to success.
- It can lead to more meaningful work and can be a source of innovation and inspiration for new ideas and solutions.

- About being able to formulate connections between these and develop a big picture view of the industry that you are interested in.

WHY

- Unearth immediate and upcoming opportunities and threats.
- Build Conviction in the problem that you have set out to solve.
- A big-picture understanding can guide strategic decision-making and help in positioning the new venture for long-term success

Discovering your passion requires you to identify and explore area/s that seem to interest you deeply, and reflect why that interests you...do you, your family or your friends have a personal experience with the space...does the space excite you with its possibilities...do you have knowledge and skills related to the space...

The discovery of your passion and developing a Macro-perspective of the industry often goes hand in hand...if you are curious and explore a space that interests you initially, you are likely to discover

interesting and sometimes awe-inspiring information and facts about it, discover role models who are building and developing those industries in innovative ways, and start to formulate your own ideas and views of possibilities. You may also discover problem areas that may need attention or are not yet solved or solved well enough to the liking of customers...

Developing a zoomed-out view of the industry gives you insights into all of this and more.

Call-To-Action

1. Explore Industry Case-study- Part 1

Tool and find the area that interests you and analyze why that area, industry and or domain might be attractive for a new startup. The industry Case study – Part 1 has 16 industries. Choose 2-3 areas that you are really passionate about and deep dive into the Industry overview, Growth outlook and the start-ups in that space.

If you already have a problem area identified, please take this opportunity to identify why this problem and industry might be attractive for a new startup.

Industry Overview

An industry overview provides a snapshot of a particular industry. It offers insights into major trends, innovations and underlying dynamics shaping the industry. Think of it as a bird's-eye view that helps you understand the broader landscape. It serves as a great starting point for you to identify your area of interest or to understand why your area might be attractive for a new startup.

Growth Outlook

Imagine you're searching for the perfect job after graduation. Just like you'd look for companies with a track record of success and growth, understanding the growth outlook of an industry is like peeking into its future potential. It's like choosing to work for a company that's expanding rapidly, rather than one that's struggling to stay afloat. The growth outlook tells you where the industry is headed—whether it's booming with new opportunities or facing stagnation. Ideally a new startup would work in a booming industry that has promise of growth in the near future.

Facts and Trends

Facts and trends provide a deeper understanding of the current state and direction of an industry. They can offer valuable insights into consumer behavior, market dynamics, and emerging patterns that shape the business landscape. This is the data evidence you need to ascertain that the industry that you are looking to operate in is truly attractive for a new startup.

Just like keeping up with the latest trends on social media or in fashion, staying informed about industry facts and trends is important. It can help you uncover new problems and opportunities and anticipate changes in consumer preferences.

Whether it's the rise of e-commerce, the growing demand for sustainable products, or the adoption of AI technology, being aware of facts and trends will help you zero in on the right problem to solve and meet evolving market demands.

Start-Ups

Exploring startups within a specific industry helps you see how others focus on particular domains to address diverse needs effectively. This targeted approach offers tangible examples of innovation and opportunity, providing valuable insights and inspiration for your own ventures. Understanding the importance of concentrating on one domain reveals the effectiveness of solving specific challenges rather than trying to address every issue across an entire industry.

Exploring the above should enable you to develop the big picture of the industry, identify gaps that you may not have been aware of earlier, review startup role models and understand how they are solving some critical problems in the industry. You will also be able to identify key evidence for the current and future growth of the industry to objectively determine its attractiveness for any future startup activity that you might undertake.

2. Create your Passion CV

Now that you've gained insights into identifying industries and understanding problem areas through this lesson, it's time to put your knowledge into action. Follow the steps outlined in the course to craft your Passion CV. This document will help you articulate your personal connection to a specific industry and problem area, reflecting your passion and potential as an entrepreneur. Use the exercise provided to:

- Define the problem area or challenge that resonates with you.

- Determine the associated industry of your chosen problem area.
- Assess and rate your personal interest level.
- Identify your key technical and entrepreneurial skills
- Describe your connection to the industry, drawing on personal experiences and insights.
- Identify and list the top three growth factors that make the industry appealing and promising.

Remember, your Passion CV is a vital tool for focusing your entrepreneurial vision and communicating your aspirations to others. Be thorough and authentic in your responses to showcase the depth of your interest and commitment. Having the staying power to truly and effectively solve a problem worth solving is one of the most critical attributes of an entrepreneur and your Passion CV is a way to discover that about yourself.

If you already have a team and you joined the program in a team, this should help you establish the clear motivations, and skillsets of you and review that with your team.

3. Pitch Your Passion CV and Form Your Team

After creating your Passion CV, the next crucial step is to find and join forces with team members who share similar passions. This activity not only allows you to network but also gives you the opportunity to build a strong foundation for your future entrepreneurial endeavors. Follow these guided steps to maximize your chances of forming the ideal team:

Tips for Effective Team Formation:

Open Dialogue: Encourage open conversations about skills, experiences, and expectations. This transparency will help ensure that team dynamics are positive and productive.

Shared Vision: Make sure that all team members share a common vision and are committed to the same goals. This alignment is crucial for long-term success.

Diversity: Consider forming a team with diverse skills and backgrounds. Diversity can lead to more creative solutions and a broader understanding of the problem space.

By following these steps and tips, you can effectively pitch your Passion CV and form a team that shares your entrepreneurial spirit and drive. This process not only helps in finding the right collaborators but also in laying the groundwork for successful entrepreneurial ventures.
